## PROFILE

Dedicated and proficient Front-end Engineer with a 7-year track record of building impactful web solutions focused on delivering an exceptional user experience. Leveraging my expertise in ReactJS, JS, TypeScript, HTML, CSS, & WordPress Development. Passionate about user experience; aiming for a role to further utilize my skills for optimal digital innovation.

## EMPLOYMENT HISTORY

### Frontend Engineer at Mindimedia, Bali

August 2017 — February 2021

As a Front End Engineer at Mindimedia, I played a central role in developing the company's web platform showcasing Indonesian villas and hotels. I crafted responsive designs using technologies like JavaScript, HTML, CSS, Vue, and Nuxt.js. I also enhanced SEO visibility, led Google Ads campaigns, and collaborated with marketing to boost online bookings. My efforts significantly increased reservations for our hotel and villa clients.

### Frontend Engineer at Freelance

March 2020 — September 2021

As a freelance Frontend Developer, I've had the privilege of working on diverse and impactful projects. I designed a website for a subsidiary of one of Indonesia's major banks, ensuring it met the highest standards of the financial industry. Additionally, I crafted a visually appealing and user-friendly platform for the Furniture company on Jakarta, capturing the essence of their intricate designs. My freelance journey also led me to develop a website for a Japanese school in Bali, seamlessly blending educational functionality with a touch of local aesthetics.

### Frontend Engineer at Hijra, Jakarta (Remote)

February 2021 — September 2023

As a Front End Engineer at Hijra, I pioneered the development of web application focused on P2P funding, leveraging ReactJS, TypeScript, and Tailwind CSS. This venture highlighted my adaptability in web development and my ability to deliver user-centric solutions.

Additionally, I led the creation of custom WordPress themes for the company website, enhancing the company's digital visibility. Collaborating with SEO, marketing, and growth teams, I harnessed PHP, JavaScript, CSS, and SASS to ensure optimal site performance.

## EDUCATION

- S.Kom, Universitas Udayana, Bali

## INTERNSHIPS

### Network Engineer at Cyberaksess, Bali

October 2016 — December 2016

During my internship at Cyberaksess, a renowned ISP company, I assumed the role of a Network Engineer. Over a span of 3 months, I was immersed in the intricacies of network management and optimization. My responsibilities included troubleshooting, setting up, and maintaining networks to ensure smooth and efficient operations. This experience provided a deep understanding of the underlying infrastructure that supports robust digital platforms.
